

TCI NY provides an essential service to New Yorkers

Processing, recycling, and repairing transformers

TCI of NY is deemed an essential business in New York for its role in the power industry. The company goes to the utilities with specialized trailers to pick up damaged or broken transformers to be inspected. They are either repaired or recycled. 99 percent of the material processed is salvaged for beneficial re-use rather than landfilled.

“The service is especially important today due to severe storms knocking out transformers. This has resulted in supply chain issues for the utilities,” said John Hamor, Capital Energy Partners. “TCI removes the damaged transformers so they can be replaced or repaired.”

Transformers move electricity from higher to lower voltages so it can be delivered safely to homes, schools, and businesses. Everything related to electricity uses a transformer.
